

Instant Computer Classrooms with Security

Arkel Computer Services Ltd was formed in 1983 and for 20 years we have been supplying the IT needs of industry, business and education. Among our many satisfied customers is the NASUWT and we supply to schools all around the country.

We also offer various ways of acquiring your IT equipment. You can buy outright, buy over a period of time or rent equipment according to your needs. We supply the total solution - desktop PC's, laptop equipment, and network and mobile computer solutions.

MCR- Mobile Computer Room (Education Edition)

A customisable easy-to-use computer room that can be delivered to the classroom and used by teachers to enhance daily lessons. Storage for up to 32 notebooks and accessories like printers, scanners and digital cameras. Computers are charged while they are stored in the trolley - no need to have 32 plugs in your cupboard.

The MCR is a very secure option: the notebooks can be locked in the trolley and the trolley easily secured in a locked storage cupboard or office and anchored to the ground.

MCS20

The Mobile Computer Storage Unit (MCS) securely stores and recharges up to 20 notebooks. Two retractable drawers allow storage of other expensive equipment such as digital cameras or data projectors. The MCS has a built-in electronic monitoring system (EMS) that checks the temperature and current being used by the trolley. Internal fans efficiently cool the trolley and charging is suspended if the unit goes above the recommended temperature. Charging recommences when the temperature drops to a safe level. The unit may be linked to the building's alarm system via the EMS, so that the alarm system will not set unless the MCS is in the correct position.

Notebook Safe

The Notebook Safe has been designed to offer a secure place to keep your notebook while not in use. Made from double skinned steel, it is attached to the wall in a minimum of 4 places. The Notebook Safe comes in 3 sizes, holding 4, 8 or 11 notebooks. Customers are using the Notebook Safe for far more than just computers, with photographic equipment being high on the agenda too.

Laptop Locker

The Laptop Locker has been designed to securely

store a single notebook while the user is away from his or her desk. The Laptop Locker is made from high grade steel and is secured to the desk. A one-push lock is protected by a steel rim, so as to make it as inaccessible as possible for a thief.
